Knowledge of foreign languages

English advanced

Skills

- Programming languages: Java/JEE(advanced), C/C++(good), PHP(good), C#(beginner)
- Tools and Libraries: JavaFX, JSP, JDBC, Hibernate, Eclipse, Visual Studio, GitHub
- Database: Oracle, SAP Sybase, MySQL, MariaDB
- Operating systems: Windows, Linux(Shell and Bash)
- Scripting languages: XML(also FXML), HTML, CSS

Projects

- **goGym:** JavaFX-based Java application for real-time training. Application allows you to create an account, create and carry out your training plan. In addition, it is possible to track your progress in particular exercises, your body, and also within a month and a year. Additional functionalities are calculators that calculate basic indicators. Link: <https://goo.gl/zU52oi> (GitHub)
- **Portfolio:** My own portfolio. It was made with HTML, CSS and basic Java EE tools such as servlets, filters, jsp sites and configuration files. It is functional enough, that all changing data such as: projects, description(about me), cv are in text files and they are easy modifiable. In addition, an email service has been implemented using java.mail library. Link: <https://goo.gl/Pqb5yW> (GitHub)
- **Bicycle shop database:** The project was to create an entire database system for a bike shop. The designed database has views, procedures (adding client, transaction generator, etc), sequences, and jobs. The system was designed for Oracle and SAP Sybase. Link: <https://goo.gl/c8B1PT> (GitHub)
- **Browser game:** The game which I have created in junior high school is about leading a volleyball player career. It was based on PHP and MySQL. The game was sold and I do not have access to the code Link: <https://goo.gl/Ue83ZM> (YouTube)

Interests

Informatics, Football, Gym, Dietetics
